Introduction

With over 25 years of industry excellence, FAS Services has established itself as a trusted leader in providing advanced material supply and specialized technical services across the energy and industrial sectors. Built on a foundation of smart engineering, operational precision, and unwavering commitment to quality, we deliver solutions that drive performance and create lasting value.

Who We Are

➤ Our Legacy

Through a blend of innovation, expertise, and a client-focused approach, FAS Services empowers industries to meet today's challenges and build tomorrow's success stories.

For two decades, we have remained committed to delivering excellence through smart engineering and reliable energy solutions. We take pride in being a trusted partner to our clients, offering not just products and services — but long-term partnerships built on integrity, innovation, and performance.

Our Team

Our team consists of highly skilled professionals with extensive experience across all sectors of the oil and gas industry. We bring a deep commitment to excellence, providing innovative solutions while upholding the highest standards of safety and efficiency.

Our Key Teams

Engineers: Our engineering teams specialize in key areas, including mechanical, electrical, chemical, and petroleum engineering. They are responsible for designing, building, and optimizing the complex systems and processes essential to our operations.

Designers: Our design teams, including expert CAD designers, are crucial to every project. They create precise digital blueprints and 3D models of equipment and facilities, ensuring everything is planned and executed with meticulous accuracy.

Who We Are

➤ Vision

To be a regional leader in engineering-driven industrial solutions, powering progress with innovation and reliability.

Core Principles

Innovation: To bring your projects to life by sourcing and installing cutting-edge technologies that deliver smart, efficient, and sustainable results

Reliability: To deliver dependable, high-quality solutions that operate flawlessly under all conditions.

Progress: To help our clients achieve their goals and drive the industry forward.

➤ Mission

To deliver engineering-driven industrial solutions by leveraging our team's deep technical expertise and upholding the highest standards of safety and quality. We aim to foster strategic partnerships to ensure the success and growth of our clients.

Key Pillars

Expertise: We apply our extensive technical knowledge to solve complex challenges and provide effective solutions.

Partnerships: We build strong, collaborative relationships with clients to understand their needs and support their success.

Safety & Quality: We are committed to maintaining the highest standards in every project, ensuring reliable and secure outcomes.

Business Activities

FAS Services offers specialized expertise on an international scale in the oil and gas sectors, extending its prowess to petrochemicals, mining, power generation, mineral processing, metallurgical industries, steel manufacturing, renewable energy, and waste recycling for diverse industrial applications. Additionally, the company excels in construction services for residential, commercial, and industrial buildings.

Our esteemed clientele includes the world's leading engineering and construction firms. We deliver a comprehensive suite of services, including engineering project support and management, construction design oversight, inspection, and auditing of material suppliers and contractors.

The company operates several offices in collaboration with Stallion Engineering Services and Project Management Limited, located in:

- **UNITED STATES**
- **UNITED KINGDOM**
- **FRANCE**
- **ITALY**
- **INDIA**
- **CHINA**
- **TURKEY**

Furthermore, FAS has engineering offices in the GCC countries:

- **SAUDI ARABIA (DAMMAM – RIYADH – YANBU)**
- **DUBAI**
- **KUWAIT**

Our Services

FAS provides a wide array of specialized technical services & different material supply tailored to the industrial and energy sectors.

Our core service areas include:

01
Protective Coating and
Fireproofing Solutions

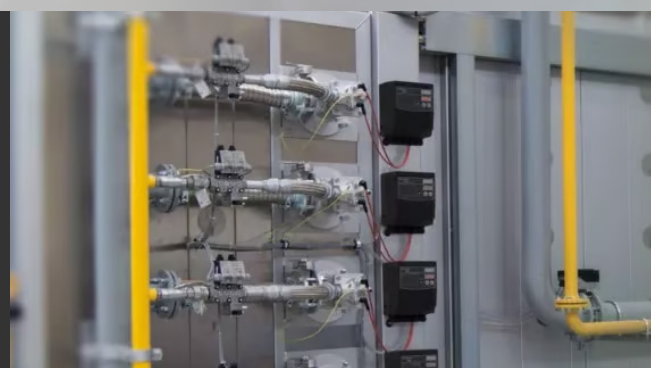

02
Fire Fighting Systems

03
HVAC System

04
Thermal Solutions

05
Generators & Motors

06
Training & Manpower
Supply

07
Valves

08
Thermal Spray
Cladding

09
Flanges

Protective Coating, Anticorrosion, and Fireproofing Solutions

FAS delivers advanced protective coatings, anticorrosion, and fireproofing services in the following sectors:

- **Commercial buildings** : Surface preparation (Skimming) & Decorative Painting for Hotels & Buildings
- **Oil & Gas, Petrochemicals & other Industries**: For Robust level of protection against highly corrosive environments , We are sole agents in Saudi Arabia for supply and application of **DURAPOL Paints** .
DuraPol UHT: High-temperature, chemical-resistant (**ARAMCO APCS-27**)
DuraPol UCR: Nano-particle enhanced.
DuraPol HTW: Glass flake epoxy for seawater.
DuraPol HTW (HV-Fast): Underwater application.
- We provide all protective coatings with anti-corrosion solutions and are specialized in painting **APCS -27, APCS -28, APCS -2E and others like APCS -1E, APCS -1B** and any other APCS Systems for your pressure vessels , tanks & equipment for **Oil & Gas, Petrochemicals & other Industries**
- FAS has advanced technology for providing Fireproofing paints on steel structures

DuraPol

Comprehensive Fire Fighting Systems

Our fire fighting system solutions are designed for industrial and commercial use, combining detection, suppression, and alarm technologies such as pumps, sprinklers, hydrants, and hose reels to ensure a fast and reliable response. We are experts in subcontracting for installation and the supply of local materials. Furthermore, we have collaborated with AZG agency for the delivery of complete turnkey projects.

HVAC Services

FAS is your single-source provider for end-to-end HVAC (Heating, Ventilation, and Air Conditioning) solutions. Our expertise covers the entire project lifecycle, ensuring optimal climate control for any commercial or industrial facility.

Our core services include:

- HVAC Design & Consultancy: We engineer efficient and robust HVAC systems tailored to your specific needs, providing expert guidance from concept to completion.
- Supply & Installation: FAS manages the procurement and expert installation of a full range of equipment. We specialize in chiller systems, VRF/VRV systems, packaged units, and rooftop units.
- Air Balancing & Commissioning: We perform precise testing, adjusting, and balancing (TAB) to ensure your system operates at peak efficiency, delivering balanced airflow and comfort as per its design specifications.
- Maintenance & Service: We offer comprehensive maintenance contracts to ensure the long-term reliability and performance of your HVAC assets.

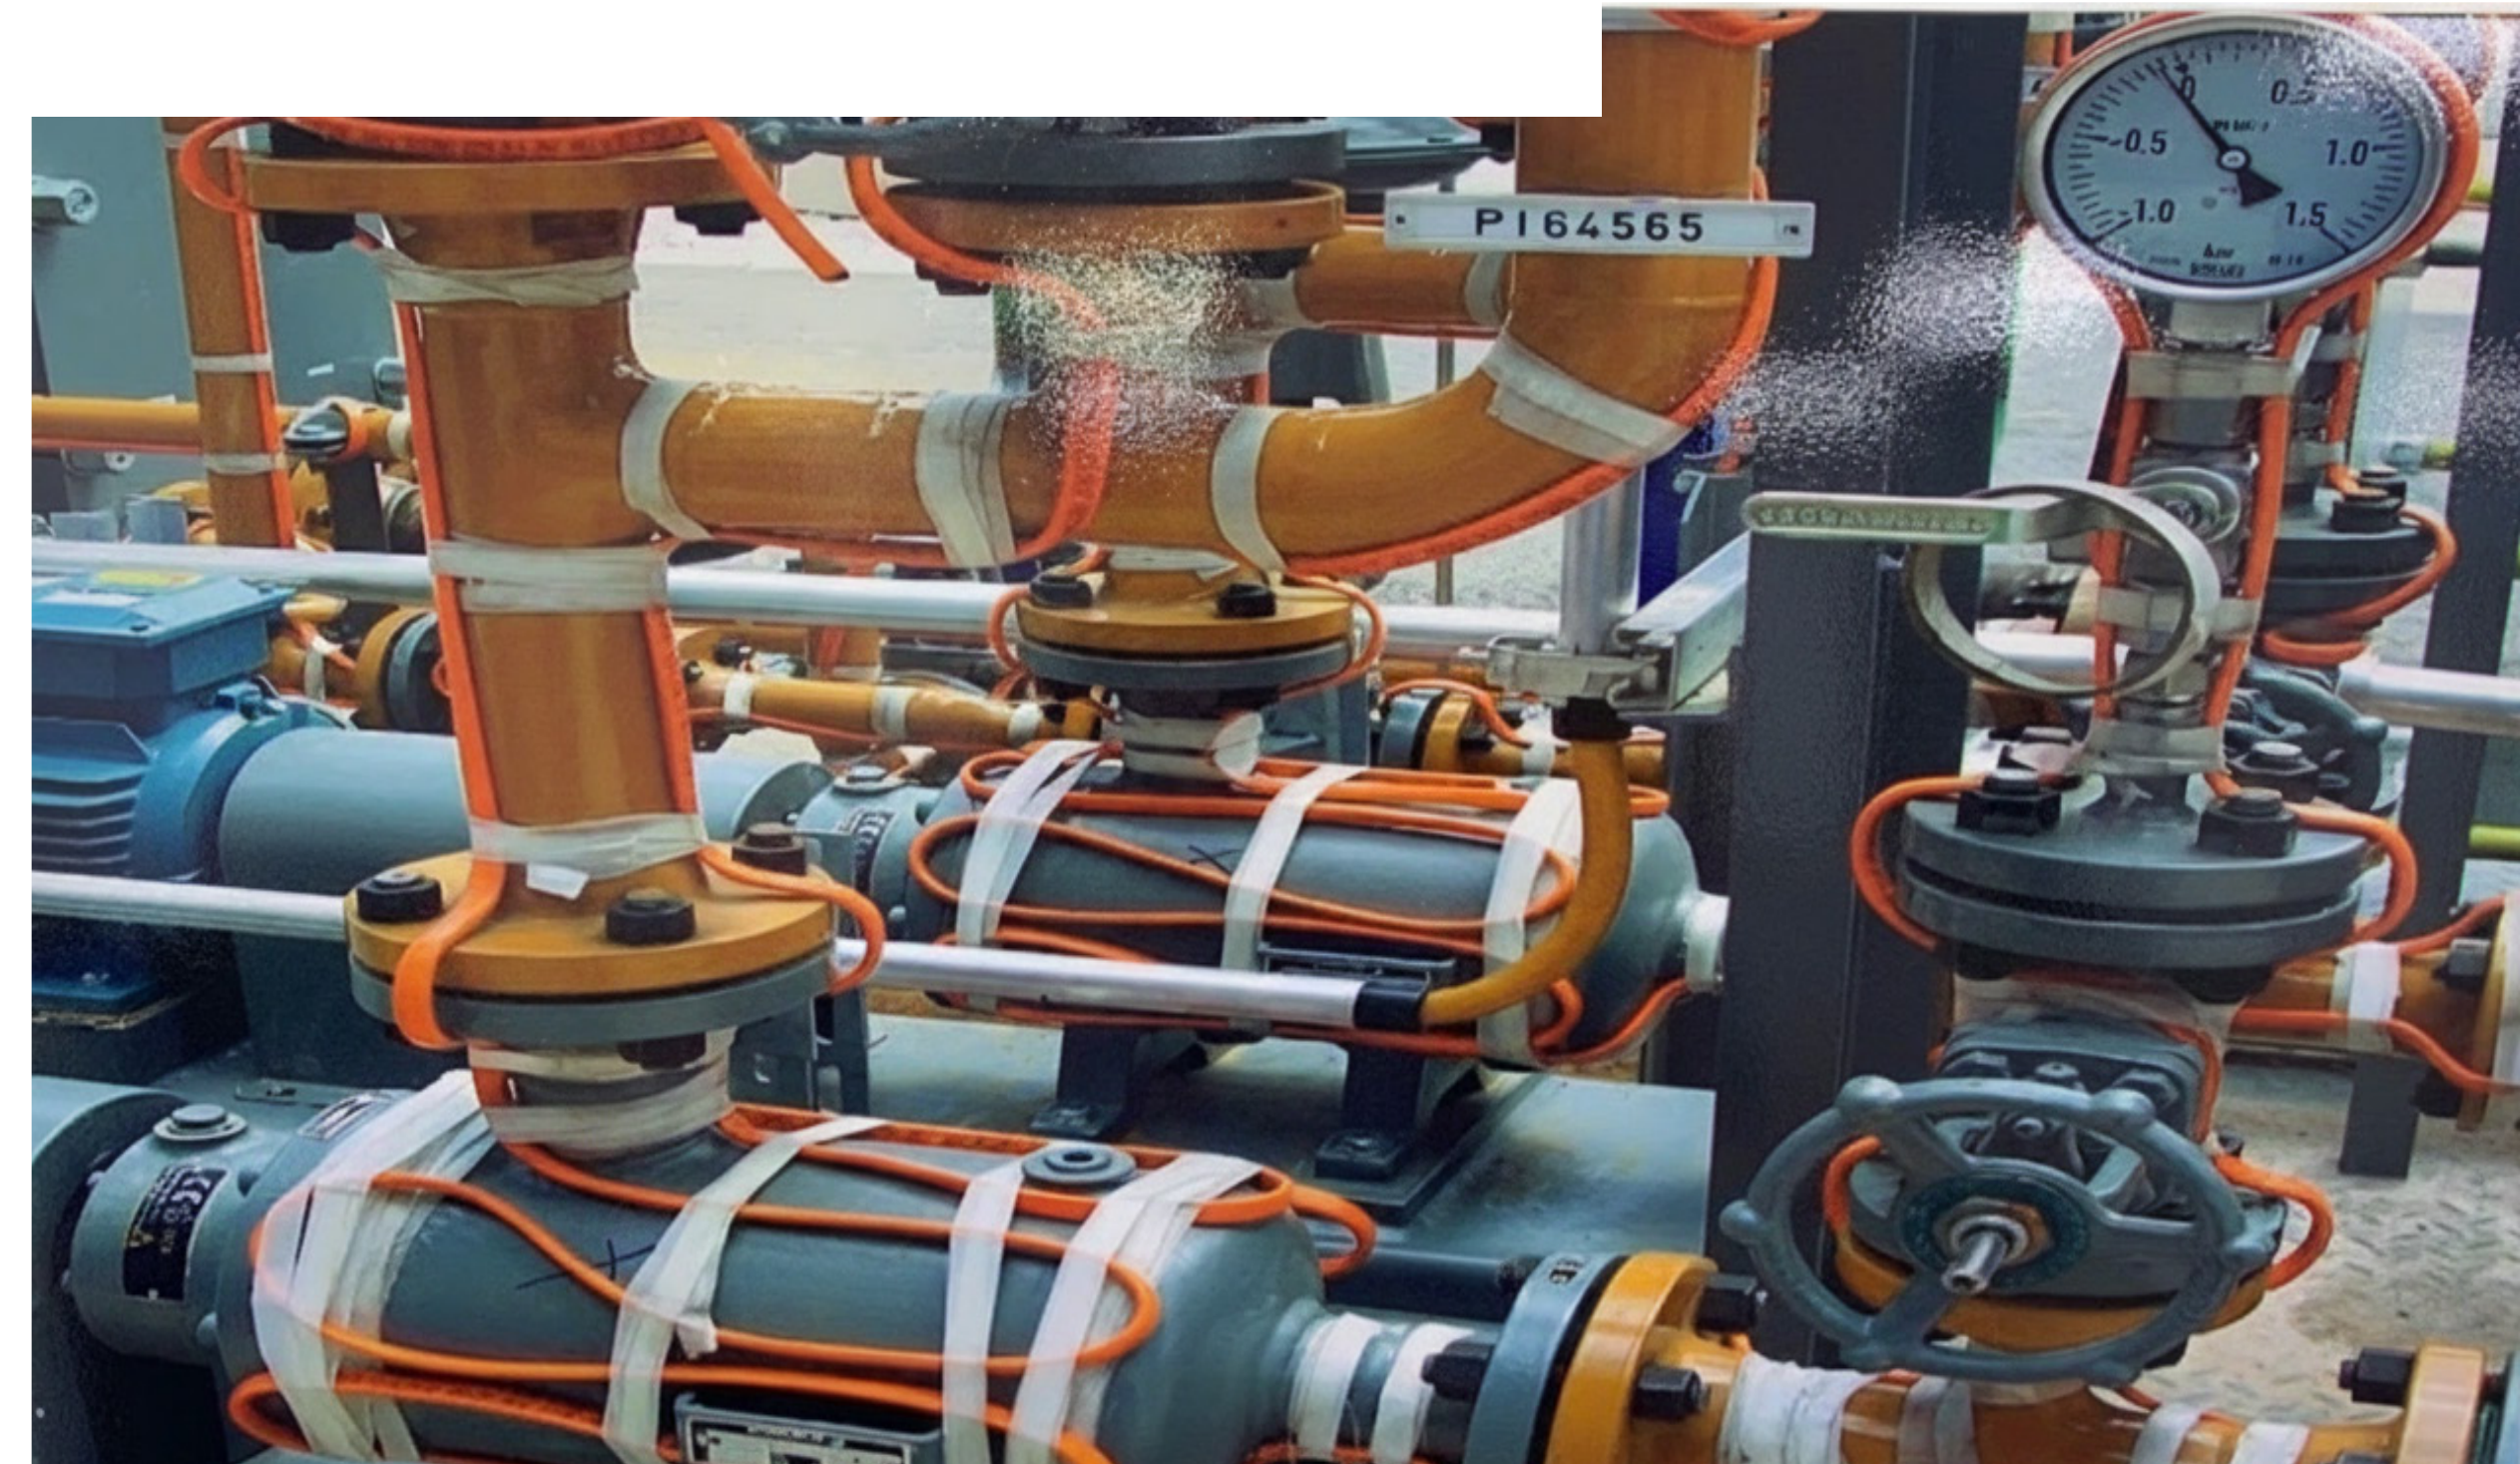

Thermal Solutions

FAS, a leading provider of complete energy solutions in the Kingdom. FAS works with state-of-the-art technology from Thermon Incorporation to offer services such as Electric Heat Tracing, Steam Tracing, Heaters, Thermal Insulation, Designing, Supply, Execution, and Maintenance.

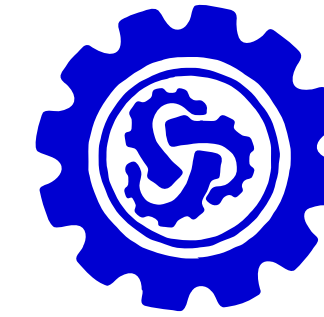

Our dedicated team at FAS is committed to providing top-notch services to ensure that your energy needs are met efficiently and effectively. We pride ourselves in delivering high-quality solutions that are tailored to your specific requirements.

In addition to our core services, FAS also offers Energy Audits for Health Process Heating Systems. Our goal is to help you optimize your energy usage and maximize the efficiency of your operations.

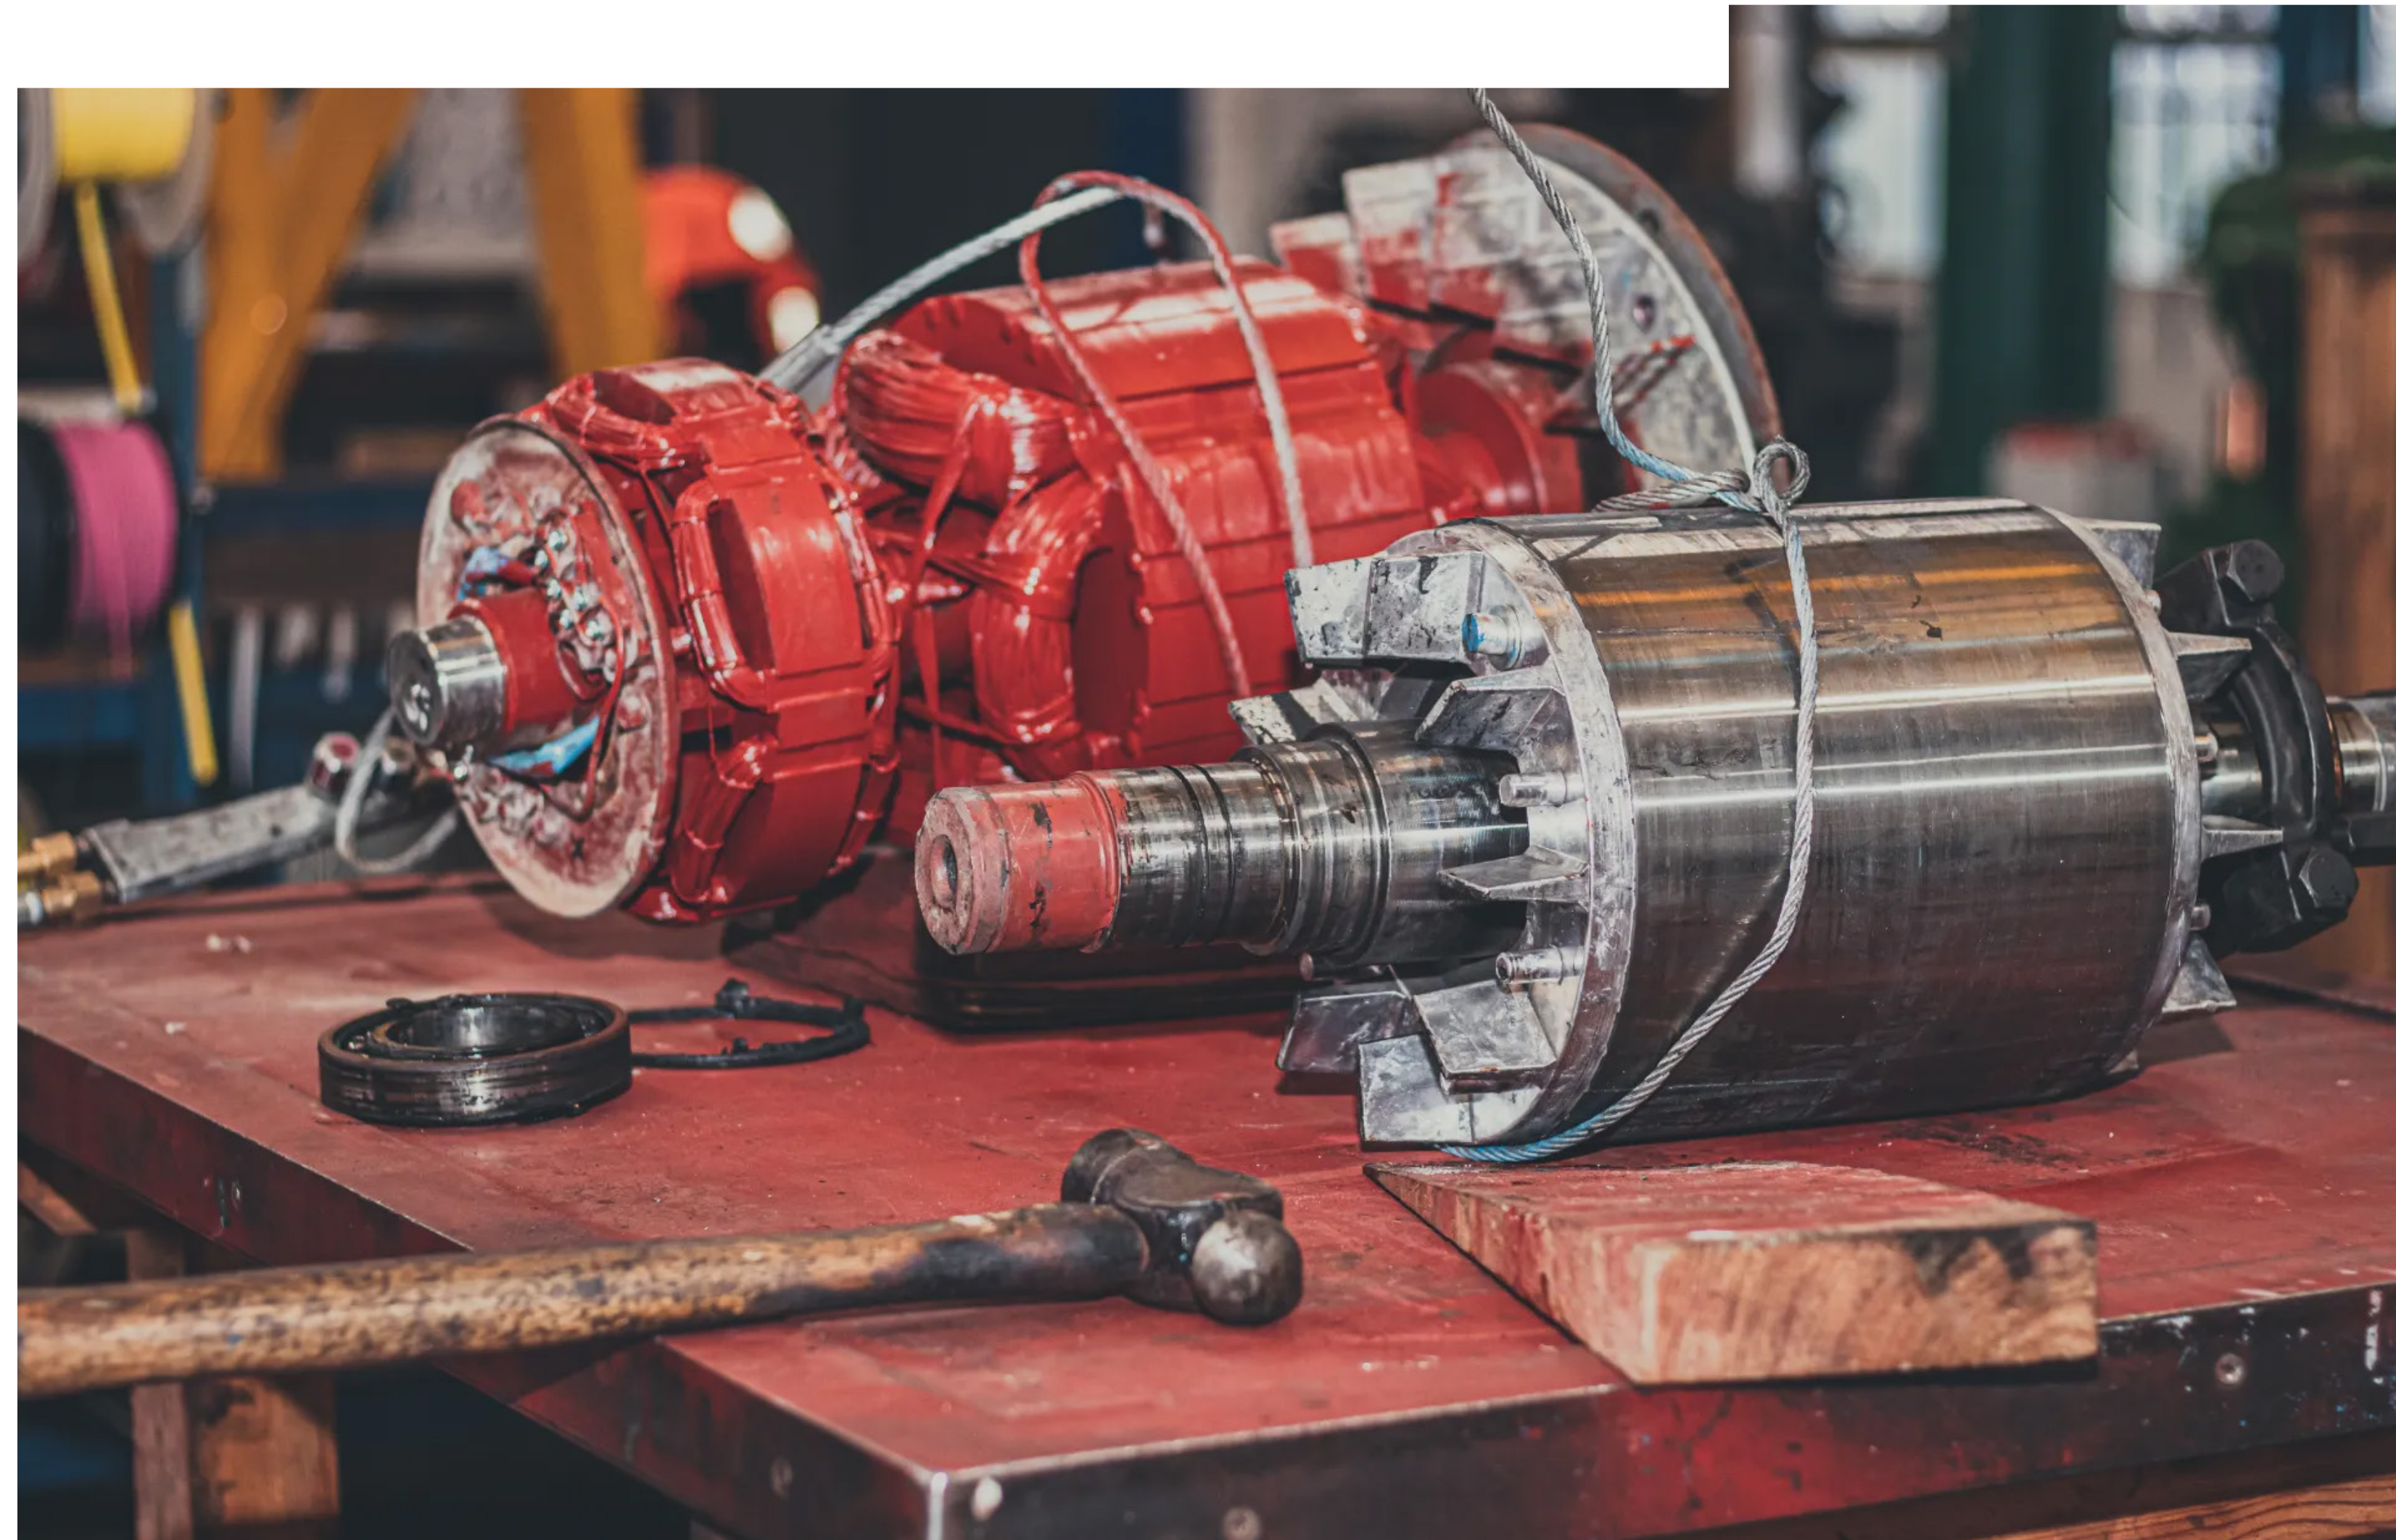

Generators & Motors Services

We offer expert rewinding services for a variety of electrical equipment including generators, motors, transformers, welding machines, and magnet coils.

Our capabilities extend to

- **Dynamic balancing**
- **Impulse surge testing, generator load testing**
- **Preventive maintenance for both low and medium voltage systems**

Training and Certifications

Manpower Supply

FAS Services Offers skilled and certified manpower for turnarounds, shutdowns, and long-term projects, including:

Skilled Trades: Welders, Fitters, Fabricators, Riggers, Scaffolders, Rope Access Technicians, NDT Techs.

Engineers & Inspectors: QA/QC, Welding, NACE/BGAS, API 510/570/653, NDT Level-III, Rope Access Level-III.

Training & Certification

NDT Expertise: Level I & II (PT, MT, UT, RT, VI) and Advanced NDT (PAUT, TOFD, Eddy Current).

Quality & Safety: ISO 9712, NEBOSH, ISO9001/14001/45001 Lead Auditor.

Equipment Supply

Conventional and advanced NDT equipment, ensuring optimal operational support:

NDT Equipment: UT, PAUT, ECT Tube Inspection, Long Range UT (GUL), PMI, Boroscopy, MPI Yokes.

Integrated Solutions: Rope Access teams with NDT capabilities.

Industrial Valves & Actuators

FAS Services is a premier supplier of comprehensive flow control solutions tailored for the energy and industrial sectors. We specialize in sourcing and supplying high-performance manual and automated valves from leading global manufacturers, ensuring full compliance with API, ASME, and ISO standards. Our Capabilities Include:

- **Comprehensive Valve Range:** Supply of Gate, Globe, Ball, Check, Butterfly, and Plug valves for most required applications.
- **Complete Automation Solutions:** Fully assembled and tested actuated valve packages with electric, pneumatic, and hydraulic systems.
- **Premium Materials for Demanding Services:** Carbon Steel, Stainless Steel, Duplex, and other special alloys for high temperature and corrosive environments.
- **Guaranteed Standards Compliance:** Strict adherence to all major international and client-specific standards

Thermal Spray Cladding

FAS services is a specialized contractor delivering expert on-site thermal spray cladding solutions to protect critical metal surfaces from corrosion, wear, and extreme environments.

Since 2003, we have been a trusted specialist in corrosion protection, extending asset life and minimizing operational downtime for our clients. Our commitment to excellence is proven by our adherence to global standards, including ISO and FROSIO compliance.

Core On-Site Services

- We provide a fully mobilized, self-contained thermal spray setup directly at your facility,
- eliminating costly logistics and delays. Our advanced processes provide robust surface protection without causing heat distortion.
- Arc Spray: Ideal for efficiently coating large surface areas, this process creates a dense, strongly adhering protective layer.
- Flame Spray: A highly versatile method perfect for coating complex geometries and hard-to-reach areas.

Industries Served:

FAS services provides high-performance surface protection for demanding industries where equipment integrity is critical, including:

- **Oil & Gas and Refineries**
- **Chemical Processing**
- **Power Generation**
- **Clean Energy (Biomass, Waste-to-Energy)**

SPARK

Flanges & Piping Components Supply

FAS services specializes in the supply, installation, and testing of highquality steel flanges for the most critical applications in Saudi Arabia's energy and mechanical industries. We provide and service all standard types—including:

- **Welding Neck**
- **Slip-On**
- **Blind flanges—as well as specialized solutions like Orifice and Long Welding Neck flanges.**

To guarantee world-class product quality, we have a strategic partnership with the Galperti Group, a global leader in industrial forging. This ensures the components we install are manufactured to the highest international standards, using materials from carbon steel to high-performance alloys.

Our comprehensive service includes the innovative G-C® Compact Flange System®, a lightweight and certified alternative to conventional connections. Our capabilities also extend to the supply and installation of high-integrity Valves, Slewing Rings, and Special Forged Products from Galperti.

Based in Dammam, our expert team combines Galperti's manufacturing excellence with hands-on local service. We deliver fully tested and commissioned solutions, ensuring reliability and performance for projects across the Kingdom.
